

Finance for the Digital Age

Industry Centric. Business Driven. Technology Powered.

What does the Modern Finance organization look like?

Insight Driven

65% of finance departments indicated demand for expedited financial information delivery as the top pressure impacting financial management.^[1]

Providing 24/7 insight to everyone when, where and how they need it drives proactive data-driven based decisions giving you competitive advantage.

Ultra Efficient

Research shows that worker productivity can increase by 50% when companies apply technology more precisely, with solutions tailored to specific jobs or roles.^[2]

Utilizing consumer grade user experience and interactions along with mobility, the workforce can deliver a level of efficiency never before achieved.

Collaborative

Finance professionals put business and social collaboration second (after analytics) as the technology they most expect to improve performance and value.^[3]

Creating a collaborative culture across the enterprise through an integrated enterprise social network increases shared accountability, auditability and productivity.

Strategic

Best-in-Class organizations are 48% more likely than all others to have a solution that is easily tailored to support business change.^[4]

Accommodating business expansion and contraction from an ever changing global economy demands a flexible and agile business model that accurately reflects your business.

In Control & Compliant

69% of Best-in-Class organizations have integrated business applications that serve as a complete and auditable system of record.^[5]

Meeting the needs of modern organizations in the 21st century requires an accounting system that supports the "basics" as well as advanced capabilities to maintain compliance and control.

Modern finance executives are business driven and technology powered, making them valuable strategic business partners to the entire organization.
